Travel set (2.0.0.23) [Active Installs: 20.926] Movavi Video Suite - Start a vacation video, even your family is excited about traveling. Travel set: Add music, a logo, titles, transitions, and effects. Available for both Windows and macOS, this video editor allows you to put together and edit your own professional-quality videos. You can use the Effect Library to add 3D visual effects or transitions. An important feature of this video editor is the ability to perform some editing of videos without using another video editor. You can make a video or film and then make changes to it. For example, you can remove the audio of a video or cut out a part of a video to create a new video. To add videos to your new project, you can import files from your computer or a camera, or add files from your photo library. Then, you can apply one or more video effects to the video. You can change the style, brightness, contrast, and resolution of the video. You can also apply a variety of audio effects, adjust the audio volume, and create a custom soundtrack. You can also add titles, texts, and logos to your video. Travel Set in Movavi Video Suite: Movie Maker Movie Maker. Movies Maker. Movie Maker.
