Category:Publishing software Category:Publishing software for MacOSQ: How to find the successor of the integer n in an array in binary representation? int main() { int x=100; int j=x; int n=x; int i; for(i=0;i of the applied field. This allows us to reduce the amount of field produced by the coils to the half or less. We have also managed to reduce the induced voltage by 60%. The prototype for the variable frequency exciter has been tested and it is able to produce a field as strong as 2.1 mT. This field is produced with the applied current of 20 A. The frequency of the generated field can be changed from 0 to 400 Hz. At a particular frequency, the output is saturated at that frequency. The author would like to thank Takumi Ohta, Hiroyuki Arai, Takehiko Hosaka, Tomohisa Shimamura and Kiyoshi Taniguchi for their useful comments. The author declares no conflict of interest. .. – MEANINGFUL QUOTATIONS – “There is an inextinguishable dignity of truth itself in the very idea that there are truths, and they are neither true nor false, but good or evil.” – M. Heidegger “The inward world is real, the outward world is as good as not.” – Martin Heidegger “There is a difference between giving and giving meaning. Giving is simply a matter of making things available; giving meaning is a matter of making things present.” – Walker Percy
