BRCSQ27380001 96 P0120 - P0121. Sequel 2.0 24 The engine cranks and turns over and the timing light comes on. There is a slight burning smell but the engine seems to run properly. No light comes on and car does not turn over. The computer starts up and initially starts the correct rpms. After about 10 seconds the engine quits and the computer stops firing. When I first started up my car at an auto shop, they said the main harness was broken. (I had it wired correctly.) I was given the following: To fix the wiring harness problem, I had it re-done at some shop. Car started and ran like it should. I drove it home, plugged it in and then it failed. (It did not turn over.) It quit turning over and the diagnostic light came on. Some part in the engine harness, had come off. The computer code is not affected. Now, I have this problem. 3ef4e8ef8d
