A: This is an excerpt from the Wikipedia link you posted (emphasis mine): Commonly known as challenge, a sniper is a clandestine stealth agent, who uses rifles and/or crossbows to kill targets that are in specific locations, while remaining undetected. This is a slang word, not a technical term. I agree with the top comment from @Dan Guzman about "challenge" being used to refer to a kind of race. Major League Baseball's no-hitter seemed to be in the bag for Seattle Mariners reliever Seúper Morales, who never gave up on a full-count fastball to Colorado Rockies batter David Dahl in the ninth inning. That's when a misplay by third baseman Zunino and a wild pitch by catcher Christian Vázquez allowed Dahl to roll one through the infield, score from second base, and fall into the glove of Mariners shortstop Jean Segura to give the Rockies a 3-0 victory. Here's what happened: The no-

(Focus Features) Before the recent release of the latest installment in the "Batman" film franchise, "The Dark Knight," I would never have imagined that the villainous Joker would ever be cast in a way that didn't fit him into some sort of 4/4 time. But the movie has shown us over the years that the Joker, played by Heath Ledger, is a virtuosic actor — maybe even more so than the magnificent Tom Hardy, who plays villain Bane in the film. For those who haven't seen the film, this is an excerpt from The New Yorker interview with Hardy in 2009, in which he explains how the film's Joker has become his most challenging role. "I would say the Joker is the most challenging character I've ever played in my life, and the most rewarding," he said. "I don't think any actor ever has — ever — with maybe the exception of, say, Brando, or Orson Welles, or Lee Marvin — there's never been an actor who's taken such extreme risks. I've worked with some who have done very similar things — it's taking that level of engagement."Antitumorigenic activity of melatonin in rats with HeLa cervical carcinoma. The aim of the study was to evaluate the effect of melatonin as a single agent, or in combination with cisplatin, on cell proliferation and apoptosis in HeLa cervical carcinoma cells, and to compare its influence to that of cisplatin. Two experimental groups were created: f30f4ceada
