image and raster data. This software views whole earth image or satellite image with fixed resolution or variable resolution. It is easy to use, and helps to automatically detect several parameters of images. It supports digital elevation model (DEM), geographical information system, 3D surface model and satellite image. Spatial Aspect Viewer's main features: 1. Read whole earth image, satellite image and raster data. 2. Support several formats of whole earth image, satellite image, and raster data: Determination of the oil load in samples of coconut oil by gas chromatography. A simple and rapid method to determine the amount of oil in a sample of coconut oil is described. The determination is based on the production of a mixture of fatty acids and the addition of a large excess

of bis(trimethylsilyl) trifluoroacetamide. After hydrolysis for 2.5 h, the fatty acids are measured as trimethylsilyl derivatives by gas chromatography. The amount of oil in the sample is determined by the relative amounts of the fatty acids produced. The performance of the method is illustrated by analysis of a reference standard sample of coconut oil and evaluation of the method with respect to its precision.

But it took an advanced, educational program such as Udemy for its citizens to start utilizing UAVs to their full potential. Udemy's drones course offers a wide variety of drones and how-to's on their use. It's a perfect place to start if you're just beginning

your drone experience. Udemy's course is split into numerous modules, each of which puts several aspects of UAVs and how to fly drones in a more practical context. You can select the area of UAVs you're interested in or the topic you're most interested in:

Learning how to fly your drone is just the beginning. A majority of the Udemy course contains a vast amount of additional information on using your drone to shoot aerial photos, videos and create map overlays. Learn how to use drones to view the outside world and learn how to fly drones to create a composite picture. Udemy offers a wide range of courses on drone photography, aerial videography and photography. For those who want to purchase their own UAV and learn how to

fly drones, there are also multiple on-site universities and manufacturers to test out their products for free. Getting started can be difficult, and without enough practice, you may not be able to fly your drone properly. Udemy provides extensive tutorials with everyday drone users on how to safely pilot their aircraft. We are all familiar with the terrestrial, run and gun, world of drones and it can be a little bit difficult to learn the basics of aerial navigation in a completely different environment. The world's first 'Two-Up' drone contest, LA to LA, is coming to a close. The big winner is the incredibly unique LLA Drone Cup, which took place over the last weekend. This drone is designed with two pilots, which allows it to achieve a level of stability that isn't possible
