
The Abacus Crack [Mac/Win] [Latest 2022]

[Download](#)

The Abacus Crack + Full Product Key Free Download

Abacus counts the lines in your documents, records the line counts in a log file, and creates an invoice for you. You can create invoices for your clients or reconcile them with your employer. The program can be set to be activated by a keystroke or on its own. You can set it to execute when you start and stop it when you close Word. You can set it to launch automatically after you start or stop Word. Abacus creates a.txt file with the line count, the date and time, and the title for your invoices. This is a great program for transcriptionists who like to make good money and don't want to spend hours coding to keep track of your work. The key features of Abacus are: Counts the lines in your documents Creates an invoice based on the line counts in the log file Creates an invoice for your clients (or reconciles the invoice with your employer) You can see the line counts in your documents and the amount that you owe before you create the invoice. See the line counts for the current document in a table format. A separate log file for each document is created for easy tracking of the line counts. Options for the Line Counts: All/None - You can use this option to set The Abacus Free Download to count lines or not. Date/Time - The Abacus records the date and time that the line count was taken. This lets you create an invoice for the same time that you took your last line count. Number of Words - You can use this option to count the total number of words in your document (or a part of your document). Quarter/Whole - The Abacus records the lines that were counted in each of the 4 quarters of the year. Compare the Current Line Count with Previous Line Count You can view the line count for the current document in a table format. You can choose between a simple line count and a full-screen line count. The current document is counted in the table format, or you can start counting the lines in a specific portion of the document in the "Count From" box. In the "Select Next Count" box, you can choose between counting the first 4 lines, the first 5 lines, the first 10 lines, or the first 20 lines in the document. This is a great tool

The Abacus Crack + [32|64bit]

===== For a better understanding of this program, the following steps describe the usage of this add-in and some of the concepts behind it. 1. Download & Install ===== Download and install the Abacus for MS Word (in the form of a.wab file) at: (This file is called a Word macro (a macro is a set of instructions that define an action in a Microsoft Word document). Instructions for installing macros are given in the Word Help file). 2. Use the program ===== To use this add-in, you must: 1. Open a Word document. This can be done in a number of ways: 2. Click on the Abacus icon in the bottom left hand corner of Word. This is equivalent to clicking on the menu item Tools --> Options --> Add-ins 3. Press the F8 key on your keyboard to view the Add-ins. Click on "Macros" 4. The Abacus Add-in will appear in the "Add-ins" section. 5. Click the "Run" button to start the program. 6. The program will display a menu bar with a number of useful options. 7. Select the "Count Lines" option from the top menu bar. 8. The count will appear in the lower-right hand corner of the Word document. 9. Click on the number and the count will appear in the bottom right-hand corner of the document. (This will stop Word running). 10. Click "Save" in the bottom left-hand corner of the window to save the count. 11. Click "Close" to close the Abacus window. Use the keyboard shortcut: Tab key - count backwards from the bottom of the document to the top Ctr + Tab - count forwards from the top to the bottom Ctrl + Shift + Tab - count backwards and forwards simultaneously Mouse clicks on the number, and the count appears in the bottom right-hand corner. Mouse clicks outside the box erase the count. THE PROGRAMS, INCLUDING THE MS WORD FILE:

===== The Abacus is made up of a number of

files. These are detailed below: The Abacus: ----- C:\Program Files\Wordabacus\Abacus.wab

What's New In?

The Abacus was designed to be a line counting software program for medical (and other) transcriptionists using MS Word, versions 97 / 2000 / 2002(XP) / 2003 / 2007. Abacus will count the lines in your documents, record the line counts in a log file, and create an invoice which you can then use to bill your clients or reconcile with your employer. This version of the Abacus is a Word add-in file, like a large macro. The program is installed with Word so that it starts when Word starts, and is unloaded from computer memory when you close Word. Features:
