VinylMaster Cut is a specialized design software with almost 200 patented features. This application was created to help you create vinyl signs of all kinds, from the smallest stickers to billboards. It covers logos, type, objects, images and figures. (...) Read more Logos are very important to you because they are very representational, they act as a kind of face of your brand. A lot of companies which specialize in designing this kind of product decided to go with vector because of the ease of editing that vector has. On the other hand, a lot of non vector software exists for example AutoDesk Illustrator or Corel Draw, but the question here is the quality of the work produced. Maybe you have in your hands just created a 3D model but lacks a standard file format for sending to press later, maybe you want a high quality image for your social media, in this case you need to go to a good professional. I will introduce to you finally EasyLogo, the software that covers the rest of the bases. EasyLogo Description: EasyLogo is a powerful and simple vector logos software that is suitable for both beginners and professional designers. This vector logo software has a huge catalog of images you can use, like fruits, animals, letters, abstract designs, numbers, 3D objects, frames, and so on. (...) Read more Vector logos are the best way to get an impressive looking design for your company. The reason is that they look great on any kind of device, any screen type. Another great aspect is that it is very easy to edit their appearance, by using tools like the pen, the ruler and the filling box. However, in order to create a beautiful logo, you need to follow a few simple tips. Make sure that you spend time looking at logos, you have to be able to identify the different styles. This will give you an idea of how you want to achieve your logo. Of course, you can always use a software like Photoshop or Adobe Illustrator, but it is good to be able to use tools like the pen as well as a ruler to achieve better results. The first thing you need to consider is that if you are in the field of advertising, a calligraphy font should be what you use, or if you want to go with a typeface, a serif one is better. This way you will make your design more professional. Other aspects are the colors, the design, and so on. Here below I have listed
