I don't often use jQuery for websites, but when I do it's definitely for templates like yours! I'm always eager to see how you develop your sites. How have you been? Greetings. I've recently been doing some WordPress development and you're advice and templates have been an invaluable resource for me to create some pretty slick-looking templates for my clients. I might have to steal your localhost theme as the WordPress.org generic templates look kind of lackluster! Also, great article on AppFirst.com! All of your work inspires me and I love to see your projects like this. I am not familiar with the grid style but this is a powerful tool that you have

made. After your reorganization I wanted to ask you how did you get started out in the development of plugins and templates for WordPress? I know that you self-teach for the most part and that is why your work is so good. I would like to know how you went about learning and self-teaching. I have always thought that this field could be very easy to enter into with a great deal of flexibility if you were willing to learn a basic coding language. I am simply wondering how you learned that was your first contact with programming. Evil Dicom is a library for C# that reads DICOM files, just like .Net libraries, and parses the incoming data into objects of meaningful types. It was designed to be simple and easy to use, and can parse large files in manageable chunks. It can read sequence datasets of images, patient records, modality images, RT plans, procedures, sequences, organ information, study information and patient demographics. Evil Dicom uses COM to communicate with applications to display images. Evil Dicom supports both the C-STUDIO library and the as-standard DICOM SDK provided by NEMA. Evil Dicom Features: * Reads C-STUDIO level 2 and above DICOM files * It is C-STUDIO compatible (MS) * Supports both the NEMA (National Electrical Manufacturers Association) SDK and Microsoft's own reference implementation * Has Extensible Type Resolver(ETR) * Can be used with more than one file at once * Simple and easy to use * Allows command line parsing * Supports Visual Studio 2008 and up * Can read sequences, studies, image data, patient demographics, etc. * Can support both single file and file stream.

Caring and receiving care: children's experiences of parents' illnesses. This study explores children's experiences of parents' illness. Drawing on qualitative data from four in-depth interviews with children (aged 8-12) and two interviews with six adults who are parents, the research shows that children's experience of illness and health is shaped by what they do with their parents. Their exploration of the illness can reveal feelings of fear and powerlessness, sadness, frustration, anger and joy. These emotions can be disruptive, and children experience confusion, anger and passivity. Children can relate to parents both as vulnerable and powerful sources of nurturing, support and guidance, influencing both their responses to the illness and future health and development. Children's relationship with parents provides an important basis for care and support.

Gastroparesis in a patient with an abdominal wall defect. Acquired gastroparesis is thought to be an uncommon complication of abdominal wall defects. The case of a 10-year-old girl with an abdominal wall defect, secondary to the treatment of an intra-abdominal abscess, is presented. The child presented with signs and symptoms of gastroparesis and malabsorption. Endoscopic evaluation revealed gastroparesis
