SPI Filmface Media Player is an all-in-one program designed to allow you to playback all those compressed audio and video formats, which appeared after the introduction of HDTV.

The SPI Filmface Media Player is a fast, powerful program capable of playing compressed and non-compressed media formats, such as MPG (DVD video + MPEG-4 audio), FLV (Flash Video), ASF (AVI), MTS (Satellite and Terrestrial), VOB (BD, DVD, SVCD), DAT, NFO, OGM, GPAC, AC3, AAC, MP3, MP2,

---

MP1, MP2.5, APNG,.m4a,.mp4,.m4v, WebM and other formats. Spi Filmface Media Player is basically an audio visualizer. The player gives you the ability to play FLV (Flash Video) files. It lets you play all web videos at that flash-streaming site. And also one can play Adobe Flash (.flv) files on SPI Filmface. Spi Filmface Media Player is a multiple media player in one. You can playback any audio or video media file. Not only capable of playing all audio and video, but also allowing you to playback non-audio/video files, such as photos, word documents, music, movie and so on. You can open a media file with a click of your mouse and play it in a snap. And you can also pause the media file or stop it so that you can open other files. And then you can re-open the file which previously you opened. Spi Filmface Media Player is a universal media player. It can play all kinds of media file, including many new

---

emerging media files. And you don't need to pay for the new and expensive converters anymore to play those files. You can convert all kinds of media files, including video, DVD, music, image, flash, etc. into other formats to play them on any other devices. Spi Filmface Media Player is a professional media player. It can play almost all compressed media files. In addition, the SPI Filmface Media Player is also a sound visualizer.

You can play and experience new audio experiences on SPI Filmface Media Player. You can listen to music, movie and other audio by using SPI Filmface Media Player. Key Features:

- Powerful combination of visualizer and media player
- Support almost all compressed and non-comp

TSremux is a lightweight, yet reliable application that sports support for Blu-Ray, MPG, VOB, EVOB, terrestrial TV and satellite broadcasts. It is similar in functionality to EvoDemux, if you're familiar with it, delivering, however, a more user-friendly approach. Amongst its most appreciated features, we count the ability to remux TV streams into TS or M2TS or to extract Dolby Digital from TrueHD videos, as well as the async I/O feature that allows for maximum throughput. TSremux is a portable application, no installation required to accommodate it on your system. Relying on a very simple, yet user-friendly interface, the application automatically recognizes and separates audio and video streams, allowing you to choose the ones to mux or demux. The options that you can adjust for the conversion process aren't that many, but their

---

importance is not to be neglected. Your first decision should be related to the output format: M2TS, TS – both of these with different byte packets or Blu-Ray. You can use the SUP offset option to set the exact time of the first subtitle, while the chapters can be trimmed to be of a user-defined interval. As soon as you've performed these adjustments, the streams will be processed and saved to a location of your choice. The output can be of good quality if some essential conditions are met – the input has to be of decent quality as well and the parameters should be set in a smart manner, allowing for the preservation of the original stream. Other features are also present under the hood of the program, although not visible to the naked eye; source packet headers can be removed or re-generated easily, PCR-less streams can be remixed just as well and DCTO descriptors will be reconstructed, making the output restriction

---

free. On an ending note, TSremux deserves to be on your list of stream muxers / demuxers, not only because it carries out the tasks decently, but because it's easy to manipulate, unlike similar software. On the downside, the application hasn't received updates in a long time, which is another way of saying it's not optimized for the latest media technologies. In this video you can see a little video Editor with a lot of functions, the program 'EasyMovieLab' is very easy to use and is also very stable. It is simple to

#### What's New In TSremux?

TSremux, short for Transport Stream De/Re-muxer is a lightweight, yet reliable application that sports support for Blu-Ray, MPG, VOB, EVOB, terrestrial TV and satellite broadcasts. It is similar in functionality to EvoDemux, if you're familiar with it, delivering, however, a
