Packed with the most requested features, Photoshop Elements is the perfect choice for beginners and experts alike. This guide will tell you everything about using Photoshop Elements for a professional output. Check out Part 1: Best Photoshop Elements features for all the details about the software. Make sure to check out our guide on customizing your digital camera images. 1. Using Photoshop Elements to edit camera images You may want to take pictures using your digital camera or with a smartphone or tablet. In that case, the camera or mobile device itself is still your camera and, using the phone or tablet, you can create images that look as good as any professional photographer. To obtain high quality, you need to use a smartphone or tablet. So, first, to keep your photos sharp, download them and view them on a computer with a screen display. How to download photos from your digital camera If you want, you can use a cable adapter to transfer the photos on your phone, tablet or computer. But, if your phone or tablet doesn't have a USB port, don't worry. This article will show you how to download your camera's photos to a computer with a program called WinSCP. There are several available programs to transfer photos, but WinSCP is the easiest to use and the best in my opinion. This program is free and works with many files including .jpg, .png, .tif, .pdf, .doc, .txt, etc. This program supports remote downloads of images that is, you can download the photos from any device. For more, check out our guide about how to download and save photos. Use the following steps to transfer photos from your smartphone or tablet to your computer First, download WinSCP from www.winscp.net. Install the program on your computer. Locate your photos in your camera memory. Open WinSCP. Right click or CTRL+click the photos. Select the 'Transfer Mode' in the upper right-hand corner of the window. And then, click 'Open'. The program will ask you to confirm the downloading. Click 'Yes'. The photos will download to your computer. The program will display the folders on your computer. Once the download is complete, click 'Close'. 2. Printing photos on your phone Using a digital camera is 388ed7b0c7

Use the Tool Options bar to change the Brush settings # **CHAPTER FIVE** # **The Layers Panel** **This chapter looks at** layers: how they can be used and their advantages and disadvantages. See how the Layers panel makes it easy to organize your images so that you can work on them whenever they're needed. For beginners, working with the Layers panel can be a little confusing. Perhaps this is because the Layers panel has more options available than some users may find necessary. However, once you have an idea of how to use the panel to your advantage, you'll be able to get much more out of Photoshop. # **Creating Layers** Photoshop has three types of layers: layer, adjustment, and clipping mask. Layers are where your images are stored in the program. You can use them to isolate sections of your image so you can work on them individually. **Figure 5.1A** : A layer can be organized as a stack of layers **Figure 5.1B** : A folder is a folder icon on the Layers panel **Figure 5.1C** : The Layers panel is displayed as a thumbnail on the right side of the interface

Sheriff Deputies: 60-year-old Man Died at Home Alone for Days Get the latest from TODAY Sign up for our newsletter Dec. 6, 2016, 11:24 PM GMT / Updated Dec. 7, 2016, 12:31 AM GMT By TODAY's Chris Potter This undated image released by the Gwinnett County Police Department shows Arthelle Tanner. Tanner was found dead Monday, Dec. 6, 2016, at her home in Lawrenceville, Ga. Gwinnett County police said that the 51-year-old woman had been dead since Dec. 3, 2016, and that her body was discovered Tuesday morning. Arthelle Tanner is pictured in this undated photo. (AP Photo/Gwinnett County Police Department) LAWRENCEVILLE, Ga. — Officials in Georgia have confirmed that a woman who was found dead at her home in Gwinnett County for more than three days had died of natural causes and "appeared to have been alone for a significant amount of time." Arthelle Tanner, 51, was found on Dec. 3 by a passerby who went to check on her home after hearing a knock at her door. Gwinnett County sheriff's officials said Wednesday that she died about 2:30 a.m. Tuesday, and officials said that her death "appeared to be a suicide." But they declined to say whether suicide was the cause of death when they announced the findings of their investigation at a news conference Tuesday. They did say that no signs of foul play or trauma were discovered and that her death did not appear to be suspicious. Authorities announced that a necropsy will be conducted to determine her cause of death. Police also asked anyone with information about her death or her whereabouts over the last three days to call 911 or the Gwinnett County Crime Stoppers at 404-581-8477. Anyone with information about another death at the home earlier this year was also asked to contact Gwinnett County police.Q: How to programmatically create a minimum viable product? I'm trying to write a Pro Bono Work Program. I'm trying to make sure that I have a clear set of criteria that I can share with a volunteer and they will make the decision to start working with me. The problem with the following criteria is that it is extremely vague: Great Communicator Able to follow
