"The goal of our HyperMotion Technology is to make the game feel more responsive and exciting than ever before," said Peter Bosz, FIFA Lead Game Designer. "We've taken every aspect of football and treated it as a challenge. We're building on the strengths of FIFA to make the game more realistic and more unpredictable, but also more thrilling for our players and fans." The game's highlights include: Dramatically Improved Player Controls - Immersive gameplay enhances the player controls, allowing the players to complete each move with velocity and accuracy - Immersive gameplay enhances the player controls, allowing the players to complete each move with velocity and accuracy Improved Goalkeeper Interactions - Now more involved with the ball, goalkeepers are challenged with their new positioning when blocking shots - Now more involved with the ball, goalkeepers are challenged with their new positioning when blocking shots New Quick-Turning Tactical Maneuvers - A more realistic passing game puts pressure on the player to turn quickly and accurately in order to play the ball into space - A more realistic passing game puts pressure on the player to turn quickly and accurately in order to play the ball into space Enhanced Tactical Defending - Combined with an arsenal of new "D-Moves," players have the ability to defend effectively against the best aerial and long-range attacks - Combined with an arsenal of new "D-Moves," players have the ability to defend effectively against the best aerial and long-range attacks New Improvements to Ball Movement - Smarter and more realistic ball movement with increased responsiveness and improved intelligence, allowing players to more realistically control the ball in all situations - Smarter and more realistic ball movement with increased responsiveness and improved intelligence, allowing players to more realistically control the ball in all situations Greater Visibility on Aerial Duels and Tackles - With greater visual fidelity for players to contend with, the player will have to be smarter about the tackles they make, counter-attacking more effectively after receiving a foul - With greater visual fidelity for players to contend with, the player will have to be smarter about the tackles they make, counter-attacking more effectively after receiving a foul HyperMotion Technology - Brought to life with a new player passing technique and a more accurate and responsive dribbling technique Players will explore, experiment, and create great moments on the pitch by calling on their creativity and new challenges to play the

#### **Fifa 22 Features Key:**

- NEW Introducing "HyperMotion Technology," which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits
- RE-MAPPED and EXTENDED ball physics - FIFA 22 includes a new ball simulation that responds more to the experience of real-life football
- Dynamic sublimation - a technique used in advanced printing with a change in density, not temperature, causing a printable substance to become semi-transparent
- Intelligent Dribbling - Analyse and enhance the on-ball intelligence of your player to provide improved movement and the ability to control the ball in real-life football situations
- Intuitive motion control - make intuitive (without using a controller) controlled gestures to accurately head the ball and take accurate shots to complete your passes
- Introducing more realistic collisions - deal with a variety of different scenarios and remember, less is more in this mode - with "Kicks Off" when struck, players regain the awareness to control and dribble the ball with natural movement
- More animations - FIFA 22 features more animations that more accurately reflects the ball physics of real-life football (for instance, in mid-air post-contact animations). Dynamic physique orientation, athlete animations, player and ball visuals, collision masking, and out of position animations are more detailed and authentic than previous iterations
- Improved passing - reacts better in off-the-ball situations making passing easier
- Rebalanced Player Classes - FUT 22 sees the introduction of several new classes such as Futsal Heroes, who boasts incredible speed and agility, to the new Large and Dual Defenders, who provide strong tackling and marking power.
- Impact Engine - Connected head and upper-body movement types will be triggered during collisions and on-the-ball passing situations to enable a more realistic controlled dribbling.
- Enhanced Player Injuries - player and opponent ratings for mass buildups, collisions and headers.
